1.04	Agents Break Report	Summary	Summary of break time totals	Shows the summary of paid vs. non paid Break Time by agent along with the details.
1.05	Agent Rejected Interactions	Detail	Shows all interactions rejected (or declined) by agents	Shows Date/Time, Agent, BP, Rejected Time, Media Type, Interaction Result, Customer.
1.06	Agent Staffing	Summary	Shows agent staffing by interval, day, week, and month	Shows count of agents staffed, available, and occupancy.

1.2 Agent Performance Reports:

Report Number	Title	Type	Summary	Contents
2.01	Detailed Agent Interactions Report	Detail	High level details of every agent interaction	Start/end time, Type, From, To, BP, Handle Time, Disposition Code, etc.
2.02	Agent Time Allocation Performance Report	Summary	Summary of time spent by agent in various states	Login time, Not Ready Time, Ready Time, Handling Time, Busy Time, No Answer Time, Break Time, etc.
2.03	Agent Scoring Report	Summary	Summary of Interaction counts by agent	Answered, Missed, Transferred, Consult, Outgoing External, Outgoing Internal, Private
2.04	Agent Interaction Summary	Summary	Summary of all Agent Interactions	Interaction Activity, Interaction Type, Agent Time, Handle Time, and Snapshot

1.3   Audit Reports:

Report Number	Title	Type	Summary	Contents
3.01	Mistreated Interactions Report	Detail	Mistreated Reasons report - disconnects by agent or customer disconnect while on hold	Provides the details (every leg & state) of every mistreated call
3.02	Query Interactions by Origin or Destination	Detail	Used to locate specific customer interactions	Provides the details (every leg & state) of those interactions
3.03	Agent Assignment to BP Detailed Report	Detail	Shows every assign/unassign event for agents	Provides BP, Agent, Assign/Unassign, Changed By, and Date/Time
3.04	Interactions Detail Record	Detail	Provides details of every interaction	Provides the details (every leg & state) of each interaction that entered the contact center
3.05	Conversations Report	Detail	Provides details of every chat and email interaction, including the interaction transcript	Provides BP, Agent, Media Type, Duration and Transcript

1.4   Business Process Interaction Reports:

Report Number	Title	Type	Summary	Contents
4.01	Detailed Business Entity Report	Detail	Used to identify the high-level details of each interaction	Start/end time, Type, From, To, BP, Handle Time, Disposition Code, Remarks, etc.
4.02	Destination Trace Report	Detail	Used to locate specific customer interactions	Provides the details (every leg & state) of those interactions.
4.03	Interaction Disposition Codes Report	Summary	Used to summarize Disposition Code counts across agents, BPs, Media type, Campaign, etc.	Provides a count of each Disposition Code broken down by BP and Agent.
4.04	Voice Billing Report	Detail	Used to identify the Call Detail Records by date	Provides Start Time, Origin, Destination, Duration, Type, BP, Disposition Code, Completion Status
4.05	Delegated Interactions Report	Detail	Shows every interaction that was Delegated to a Supervisor either manually by an agent or automatically based upon Abandons	Entry Time, Closing Time, Remote Party, Type, BP, Agent Remark, Supervisor Remark.
4.06	Incoming Calls by Area Code	Summary	Used to provide high-level counts of incoming calls by area code or state	Originating Area Code, Originating State, City, Count of Calls
4.07	Voice Billing Report by Business Process	Detail	Used to identify the Call Detail Records broken out by BP	Provides Start Time, Origin, Destination, Duration, Type, BP, Disposition Code, Completion Status

4.08	Voice Billing Report by Business Process - No Abandoned Calls	Detail	Used to identify the Call Detail Records broken out by BP	Provides Start Time, Origin, Destination, Duration, Type, BP, Disposition Code, Completion Status
4.09	Voice Billing Report - summary only	Summary	Provides summary counts of inbound and outbound calls and their duration	Origin/Destination, Total Calls Duration, Total Calls
4.10	Inbound Interactions Distribution Report	Summary	Interval report broken out annually, monthly, day of week, or hourly	Inbound and Abandoned counts for calls, chats, and emails.
4.11	Interactions Analysis Report	Summary	Interval report broken out annually, monthly, day of week, or hourly	Inbound & Outbound counts of each Interactions, Calls, Emails, Chats, Callback Requests/Handled, VMs.
4.13	Disposition Codes Distribution Report	Summary	Count and Percentages of Disposition Codes broken out annually, monthly, day of week or hourly and by BP, Campaign, Agent, and Interaction Type	Handled, Abandoned, Disposition Code columns
4.14	Demand Interval Distribution Report	Summary	Count and Percentages of Demands broken out annually, monthly, day of week or hourly and by BP, Campaign, Agent, and Interaction Type	Handled, Abandoned, Demand columns

1.5   Business Process Performance Reports:

Report Number	Title	Type	Summary	Contents
5.01	Business Process Agent Performance Report	Summary	Count of Agents in various states broken out annually, monthly, weekly, daily, hourly, or 10 mins	Login, Backoffice, Busy, On Break, Available, Consult & Conference, Internal,
5.02	Business Process Interaction Performance Report	Summary	Provides BP summary results broken out annually, monthly, daily, hourly, and 10 min intervals	Total Ended, Abandoned, Handled, Longest Wait, Callbacks, Avg Wait Time, Avg Handle Time, Avg Answer Time, Overflow, Transferred
5.03	Business Process Callback Performance Report	Summary	Summary results for Callbacks broken out annually, monthly, daily, hourly, and 10 min intervals	Callback Requested, Processed, Avg. Handle Time, Max Handle Time, Successful Callbacks, Failed Callbacks, Purged, Rescheduled
5.04	Business Process Detailed Alerts	Detail	Identifying queue performance against pre-defined Monitoring alerts (Warning & Alarm)	Shows count of alerts and provides the details of every alert (date/time, alert details, alert level)
5.05	Queue Interval Summary Report	Summary	Interval-based results for specific queue metrics	Queued, Answered, Abandoned, Wait Time, Queue Time, ASA, Talk Time, Agents Staffed

1.6 Campaign Performance Reports:

Report Number	Title	Type	Summary	Contents
6.01	Completed Campaign Interaction Report	Detail	Detailed results of every campaign call.	Shows Destination, Disposition, Date/Time, Last Attempt, and Total Attempts
6.02	Campaign Time Frame Specific Statistics Report	Summary	Summary results of a campaign based upon the time frame	Succeeded, Failed, Wrong Destination, Handling Time
6.03	Campaign Inspection Report	Summary	Summary results of a campaign	Succeeded, Failed, Handled, No Answer, Answering Machine, Fax Tone, Wrong Destination, Handling Time
6.04	Completed Callback Interaction Report	Detail	Detailed results of every callback attempt	Shows Destination, End State, State of every Attempt, Date/Time

1.7 Customer Contact Center Reports:

Report Number	Title	Type	Summary	Contents
7.01	Customer Experience Report	Summary	High-level report used by leadership inside and outside of the call center to gauge the overall performance of the contact center in meeting the customer's needs.	Shows high level metrics broken out by BP and interaction type.
7.02	Customer Experience Trends	Summary	High-level report used by leadership inside and outside of the call center to gauge the contact center trends.	Graphical trend analysis of inbound volume, AHT, SL, and answer rate.
7.03	Contact Center Performance Report	Summary	Detailed report used by the contact center leadership to gauge their success and identify areas of opportunity.	Shows all key metrics broken out by BP and interaction type.
7.04	Abandoned Interaction Report	Detail	Provides insight into the thresholds callers waited until abandoning their interaction	Calls Queued, Abandoned and Abandoned % and Thresholds
7.05	Customer Experience Trends	Detail	Provides key queue metrics at a Demand Level	Shows all key metrics broken out by Demand and interaction type.

1.8 Call Reports:

Report Number	Title	Type	Summary	Contents
8.01	Calls Performance by BP and Destinations	Summary	Provides BP summary of call interactions only with results broken out annually, monthly, daily, hourly, and 15 min intervals	Inbound, Queued, Answered, Answer Rate Abandoned, Longest Wait, Callbacks, Avg Talk Time, Avg Speed of Answer, Avg Wrap Up Time, Overflow, Transferred

1.9 Post Call Survey Reports:

Report Number	Title	Type	Summary	Contents
9.01	Post Call Survey (PCS) Detail	Detail	Provides detailed information about the survey taken for an Agent and the answers and/or feedback received.	Shows survey answers and any transcribed recording content.
9.02	Post Call Survey (PCS) Summary Agent	Summary	Provides the average scores of agents for a specific Post Call Survey across all Business Processes and/or a specific Business Process.	Shows the average score of a specific survey for Agents.
9.03	Post Call Survey (PCS) Summary BP	Summary	Provides the average scores for a Post Call Survey across all Business Processes and/or a specific Business Process.	Shows the average score of a specific survey in a Business process.

1.10 Key Reports for New Clients

For new clients, we suggest the following reports to get familiar with the types of information readily available to the contact center leadership team.

Leadership Question	Answer
How is my contact center performing?	7.03 Contact Center Performance Report
How are my agents performing?	2.04 Agent Interaction Summary
Where are the details on every interaction?	4.01 Detailed Business Entity Report
Where are the details on my Agents?	2.01 Detailed Agent Interactions Report

What happened on a specific interaction?	4.02 Destination Trace Report
How many total calls did I receive? On a specific phone number?	4.04 Voice Billing Report

2.   Overview of Standard Reports

2.1   Agent Management Reports

Report 1.01 - Detailed Agent Activity

Parameters:

- Customer Database
- Manual Start Date
- Manual End Date

2.2   Agent Performance Reports

Report 2.01 - Detailed Agent Interactions

Parameters:

- **Customer Database** - source database
- **Manual Start Date**
- **Manual End Date**
- **Period -** Choices are Custom, Last Hour, Today, Yesterday, Last Week, This Month, Last month, Last Year, This Year, Last 7, 14, 21 or 30 Days
- **Calculated Start Period**
- **Agents**
- **Media Type**
- **Group By**
- **Direction**
- **Disposition Codes**
- **Enable Pagination**
- **Time Zone** - customer's time zone by Default
- **Display Language**

- **Calculated End Period**
- **Interaction Types**
- **Show Remarks** – checked value to include remarks
- **Transferred Interactions Only** – checked valued to show only transferred interactions
- **Include Archived Data** – checked value to include archived data
- **Include CRM Data –** adds the First Name and Last Name fields from the ECS CRM
- **Media Type**
- **Client Name**
- **Product Name**
- **Inbound Campaign Name**
- **Product Type**

Fields:

- **Agent** – agent name
- **Interaction ID**
- **Start Time** – start time of interaction
- **End Time** – end time of interaction
- **Media Type**
- **Interaction Type** – interaction type
- **CRM First Name**
- **CRM Last Name**
- **Origin** – interaction origin
- **Destination** – destination of interaction
- **Business Process** – business process in interaction

- **Demand** – Demand(s) assigned to the interaction
- **Interaction Result**
- **Remarks**– remarks of interactions
- **Disposition Code** – disposition code
- **Duration** – duration of interaction
- **Agent Handling Time** – time handled by an agent
- **Hold Time**
- **Wrap-up Time** – wrap-up time
- **External Number Time** – external consult time (when the Agent consulted an external number)
- **External Transferred DID** –external number, if interaction was ended by transferring to an external number

- **Client Name**
- **Inbound Campaign Name**
- **Product Name**
- **Product Type**

Report 2.02 - Agent Time Allocation Performance

Parameters:

- Customer Database

Report 2.04 - Agent Interaction Summary

Parameters:

- **Customer Database** – source database
- **Time Zone** - customer's time zone by Default
- **Manual Start Date**
- **Manual End Date**
- **Period -** Choices are Custom, Last Hour, Today, Yesterday, Last Week, This Month, Last month, Last Year, This Year, Last 7, 14, 21 or 30 Days
- **Display Language**
- **Calculated Start Period**
- **Calculated End Period**

- **Selected Time Interval –** Choices can be Monthly, Weekly, Daily, Hourly, or 30 or 15 Minute intervals depending on the period in which the report is run
- **Business Process -** multi-value parameter
- **Agents -** multi-value parameter
- **Show Empty Rows**
- **Show Agent Details**
- **Enable Pagination**
- **Include Archived Data-** checked value to include archived data

Fields:

- **Agent Name –** Agent Name
- **Date –** MM/DD/YYYY
- **Interval –** HH:MM:SS
- **Interactions Handled –** The number of inbound and outbound customer

interactions that were handled by the agent.

- **Interactions Missed -** The number of missed/bounced interactions by the agent.
- **Interactions Rejected -** The number of interactions rejected by

the
a
g
en
t.

- **Transferred Internal -** The number of interactions answered by the agent and then transferred to another internal destination (Agent, BP, Channel).

- **Transferred External -** The number of interactions answered by the agent and then transferred to an external destination.

- **Transfer % -** The count of Transferred interactions (Internal + External) / the count of Interactions Handled.

- **Inbound —** The number of inbound interactions by the agent

- **Outbound -** The number of outbound interactions by the agent (includes both manual outbounds and campaign calls).

- **Callback -** The number of handled Callback interactions.

- **Voice -** The number of handled voice interactions.

- **Chat -** The number of handled chat interactions.

- **Email -** The number of handled email interactions.

- **Ready -** The total amount of time spent in "Ready" state during specified report time interval (Ready-Idle + Offered).

- **Break -** The total amount of time spent in "Break" state during specified report time interval. (Including custom break + No Answer Break).

- **Busy -** The total amount of time spent in "Busy"

state during specified report time interval. (Dialing + Waiting For XXX +Busy).

- **Staffed —** The sum of (Total Ready Idle + Total Break + Total No Answer + Total Busy + Dialing + Waiting For XXX + Offered)

- **Talk -** The total amount of time spent talking during specified report time interval (Voice only).

- **Hold -** The total amount of time the caller spent on hold during specified report time interval.

- **Wrap Up -** The total amount of time spent in "Wrap-Up" state during specified report time interval.

- **Handle Time Voice -** The sum of (Total Wrap Up + Total Talk Time + Total Hold) for handled voice interactions only.

- **AHT Voice -** The sum of (Total Wrap Up + Total Talk Time + Total Hold)/Voice Interactions Handled.

- **Handle Time Chat -** The sum of (Total Wrap Up + Total Talk Time + Total Hold) for handled chat interactions only.

- **AHT Chat -** The sum of (Total Wrap Up + Total Talk Time + Total Hold)/Chat Interactions Handled

- **Handle Time Email -** The sum of (Total Wrap Up + Total Talk Time + Total Hold) for handled email interactions only.

- **AHT Email -** The sum of (Total Wrap Up + Total Email Time + Total

Hold)/Email Interactions Handled.

- **Occupancy %** - (Total Busy + Dialing + Waiting For XXX)/(Total Busy + Total Ready+ Waiting For XXX + Dialing + Offered) .

- **Utilization %** - (Total Busy + Total Ready Idle + Dialing + Waiting For XXX)/Total Staffed Time.

- **Ready %** - Total Ready Idle/Total Staffed Time.

- **Talk Time % (Voice)** - Total Talk time/Total Staffed Time.

- **Hold Time % (Voice)** - Total Hold time /Total Staffed Time

- **Wrap Up % (Voice)** - Total Wrap Up time/Total Staffed Time.

- **Break Time %** - (Total Break time + Custom Break) /Total Staffed Time

2.3 Audit Reports

### Report 3.01 - Mistreated Interactions

Parameters:

- **Customer Database**
- **Manual Start Date/Time**
- **Manual End Date/Time**
- **Period**
- **Calculated Start Period**
- **Mistreat Reason**
- **Disposition Code(s)**
- **Show Details**

- **Include Archived Data**
- **Time Zone**
- **Display Language**
- **Calculated End Period**
- **Business Process**
- **Origin/Destination**
- **Interaction Result**
- **Enable Pagination**

Fields:

- **ID**
- **Media Type**
- **Interaction Type**

- **Mistreated Reason**
- **Mistreated Time**
- **Duration**

- **Interaction Result**
- **Disposition Code**
- **Last Handler**
- **Start Time**
- **End Time**

- **Originator**
- **Destination**
- **Campaign Name**
- **Hold Time**

Report 3.04 – Interactions Detail Record

Parameters:

- **Customer Database**
- **Manual Start Date/Time**
- **Manual End Date/Time**
- **Period**
- **Calculated Start Period**
- **Business Process**

- **Agents**
- **Time Zone**
- **Display Language**
- **Calculated End Period**
- **Interaction Creation Type**
- **Demands**

Fields:

- **Time Slice -** Time slice

- **Interaction ID -** the unique GUID that identifies this interaction inside ECS

- **Interaction Start Time -** Date and Start Time of the interaction

- **Interaction End Time -** Date and End Time of the interaction

- **Interaction Origin -** The FROM number for a call or email address for an email or chat

- **Interaction Destination -** The TO number for a call

and the system endpoint for an email or chat

- **BP Name -** The name of the Business Process

- **Agent Name -** The full name of the Agent

- **Agent ID –** Database sequence number

- **Pre-Queue Duration -** The difference between Call Start Time and the start of the BP's Agent Selecting segment

- **Queue Duration -** The time in queue plus ringing time until an agent answers the call

- **Agent Duration -** The total amount of time that the agent was actively on the call (excludes Hold Time) until the interaction ended or transferred

- **Total Duration -** The sum of Pre Queue, Queue and Agent Duration fields (excludes Wrap Up)

- **Hold Duration -** The total amount of time that the interaction was placed on Hold by the Agent including any time where Agent was Consulting with another Agent. If the call wasn't placed on hold, this value will be zero.

- **Wrap Up Duration -** The amount of time the Agent spent in Wrap Up state after the interaction ended.

- **Handle Duration -** The sum of Agent Duration + Hold Duration + Wrap Up Duration

- **Is Abandon -** Flag that denotes if the interaction was Abandoned

- **Abandon -** The amount of time the call waited in the queue before it was abandoned. If the call didn't abandon, this value will be zero.

- **Is Callback -** Flag that denotes the that customer opted-in for a Callback while in queue. This should exclude any callbacks manually scheduled by an agent.

- **Is Transferred Internal –** Flag that denotes if the interaction was transferred to an internal contact

- **Is Transferred External –** Flag that denotes if the interaction was transferred to an external contact

- **Is Consulted -** Flag that denotes if the interaction was Consulted

- **Demands -** A pipe-delimited list of the Demands associated with the Interaction

- **Interaction GUID –** unique agent identifier

- **Interaction Direction –** direction (Incoming or Outgoing) of the interaction

- **Origin Media Type**

- **Included in SL Calculation –** Denotes if the interaction fell within the parameters to be included in the service level calculation

- **Disposition Code**

Report 3.05 – Conversations Report

Parameters:

- **Customer Database** – source database
- **Manual Start Date**
- **Manual End Date**
- **Period -** Choices are Custom, Last Hour, Today, Yesterday, Last Week, This Month, Last month, Last Year, This Year, Last 7, 14, 21 or 30 Days
- **Calculated Start Period**
- **Business Process**
- **Agents**

- **Disposition Code**
- **Origin/Destination**
- **Time Zone** - customer's time zone by Default
- **Display Language**
- **Calculated End Period**
- **Media Type**
- **Demands**
- **Interaction Results**
- **Direction**

Fields:

- **Interaction ID**
- **Media Type**
- **Start Time**
- **End Time**
- **Duration**
- **Total Messages**
- **Originator**
- **Destination**
- **BP Name**

- **Result**
- **Agent Handle Time**
- **Sequence**
- **Date/Time**
- **Originator**
- **Destination**
- **Subject**
- **Text**

2.4 Business Process Interaction Reports

Report 4.01 - Detailed Business Entity

Parameters:

- **Customer Database** – source database

- **Manual Start Date**

- **Manual End Date**

- **Period**

- **Calculated Start Period**

- **Interaction Type**

- **Media Type**

- **Interaction Results**

- **Disposition Codes**

- **Demands**

- **Include Archived Data** – checked value to include archived data

- **Group By DDLB**

- **Time Zone** - customer's time zone by Default

- **Display Language**

- **Calculated End Period**

- **Business Process Name** – multi-value parameter

- **Agent Name**

- **Show Only Interactions with Remarks**

- **Show Interaction Segments**

- **Only Interactions Ended in "Do Not Call"** – checked value to show only interactions that ended in "Do Not Call"

- **Enable Pagination**

- **Client Name**

- **Product Name**

- **Inbound Campaign Name**

- **Product Type**

Fields:

- **Sequence** – simple enumeration for interactions in the result set

- **Start Time**

- **End Time**

- **Duration**

- **Business Process Name**

- **Demands**

- **Originator**

- **Destination**

- **Media Type**

- **Interaction Type**

- **Result**

- **Disposition Code**

- **Agent Name**

- **Campaign Name**

- **External Transfer DID** – external number, if Interaction was ended by transferring to an external number

- **DNC** – Ended in "Do Not Call" request

- **Telephony Time Incoming**

- **Telephony Time Outgoing**

- **Telephony Time** – external agent time (telephony time where agent used external terminal, not the built in softphone)

- **Telephony Total Usage Time**

- **Hold Time** – hold time before an agent handling time **Client Name**

- **Inbound Campaign Name**

- **Product Name**

- **Product Type**

Report 4.04 - Voice Billing

Parameters:

- **Customer Database**
- **Manual Start Date/Time**
- **Manual End Date/Time**
- **Period**
- **Calculated Start Period**
- **Interaction Type**
- **Group By Origin**

- **Include Archived Data**
- **Time Zone**
- **Display Language**
- **Calculated End Period**
- **Group By DID**
- **Enable Pagination**

Fields:

- **Origin/Destination**
- **Total Calls Duration -** will include all the call duration regardless of the filters exact start and stop time. It will only look for calls handled within the selected period.

- **Total Calls Prorated Duration –** will subtract the time that is outside the period filter from the call duration. Provides adjusted minutes count for a specific period.
- **Total Calls**

Voice Biling Report

REPORT PARAMETERS: (English)

Report 5.02 - Business Process Interaction Performance

Parameters:

- **Customer Database** – source database
- **Time Zone** - customer's time zone by Default
- **Manual Start Date**
- **Manual End Date**
- **Period -** Choices are Custom, Last Hour, Today, Yesterday, Last Week, This Month, Last month, Last Year, This Year, Last 7, 14, 21 or 30 Days
- **Display Language**
- **Calculated Start Period**
- **Calculated End Period**

- **Business Process** – multi-value parameter
- **Interaction Type(s)** – multi-value parameter
- **Main Table Accumulated By** – group field for the main section
- **Sub-table Accumulated By** – group field for the subsection
- **Include Archived Data** – checked value to include archived data
- **Enable Pagination**
- **Demands**
- **Media Type**
- **Group By**

Fields:

- **Business Process**
- **Interaction Type**
- **Main Time Slice** – date
- **Sub Time Slice** – Time
- **Total Ended** – total number of interactions arrived at the BP
- **Total Abandoned** – total number of interactions abandoned by customers
- **% Abandoned** – percent of abandoned interactions from the total ended

- **Handled by agent** – total number of interactions that were accepted/answered and handled by BP agents
- **% Handled by Agent** – percent of the handled interactions from the total ended
- **Max Waiting Interactions** – max number of simultaneous interactions that were waiting in queue for an available agent
- **Min Waiting Interactions** – minimum number of simultaneous interactions

- that were waiting in queue for an available agent

- **Longest Waiting Time** – longest waiting time of interaction in agents' queue until it was answered by the agent or abandoned by the customer

- **Total Handled in the BP** – total number of interactions that were handled in the BP flow prior to arrival to the BP agents (transferred out – voicemail, callback requests, disconnected by customers prior to arrival to agents queue, etc)

- **% Interactions Handled in BP** – percent of interactions handled in BP flow from the total ended

- **Total Callbacks** – total number of callback interactions arrived at the BP

- **Average Waiting Time** – average customer waiting time in queue for an available agent a

- **Total Agent Handling Time** – total duration of all customers' interactions with BP agents

- **Average Agent Handling Time** – average duration of customer interaction with BP agent

- **Average Answer Time** – average time of customer waiting time in queue until it was answered by an agent

- **Total Overflow** – total number of waiting interactions that reached longest waiting time threshold

- **Total Transferred Out External** – total number of interactions that were transferred out by the BP flow or by BP agents to some external number (transfer to voicemail or branch office)

- **Total Transferred Out Internal** – total number of interactions that were transferred out by BP flow or by BP agents to some internal contact center entity (transfer to another BP, agent, callback generation etc)

Report 5.03 - Business Process Callback Performance

Parameters:

- **Customer Database** – source database

- **Time Zone** - customer's time zone by Default

- **Manual Start Date**

- **Manual End Date**

- **Period -** Choices are Custom, Last Hour, Today, Yesterday, Last Week, This Month, Last month, Last Year, This Year, Last 7, 14, 21 or 30 Days

- **Display Language**

- **Calculated Start Period**

- **Calculated End Period**

- **Main Table Accumulated By** – group field for the main section

- **Business Process –** multi-value parameter

- **Sub Table Accumulated By –** group field for the sub section

- **Include Archived Data –** checked value to include archived data

- **Enable Pagination**

Fields:

- **Main Time Slice** – Date

- **Sub Time Slice** – Time

- **Business Process Name**

- **Callback Processed** – count of processed callbacks

- **Callback Requested** – count of requested callbacks

- **Callback Average Handling Time** – average duration of callbacks

- **Callback Max Handling Time** – max duration of callbacks

- **Total Success** – total number of successful callbacks

- **% Callback Successful** – percent of successful callbacks

- **Total Failed** – total number failed callbacks

- **% Callback Failed** – percent of failed callback

- **Total Purged** – total number of callbacks that were purged (deleted)

- **Total Rescheduled** – total number of callbacks that were scheduled

Report 5.04 - Business Process Detailed Alerts

Parameters:

- **Customer Database**
- **Manual Start Date/Time**
- **Manual End Date/Time**
- **Period**
- **Calculated Start Period**
- **Business Processes**
- **Severity**

- **Enable Pagination**
- **Time Zone**
- **Display Language**
- **Calculated End Period**
- **Counter**
- **Include Archived Data**

Fields:

- **Start Time**
- **End Time**
- **Duration (Sec.)**
- **Severity**

- **Value**
- **BP**
- **Counter**

Report 5.05 – Queue Interval Summary Report

Parameter:

- **Customer Database**
- **Manual Start Date/Time**
- **Manual End Date/Time**
- **Period**
- **Calculated Start Period**
- **Business Processes**
- **Enable Pagination**
- **Show Tables**
- **Abandoned Time Threshold**
- **Demands**
- **Inbound Campaign Name**

- **Product Type**
- **Time Zone**
- **Display Language**
- **Calculated End Period**
- **Disposition Code**
- **Show Empty Rows**
- **Queue Time Range – 1st Threshold**
- **Queue Time Range – 2nd Threshold**
- **Client Name**
- **Product Name**

Fields:

- **Time Slice**
- **Sub Time Slice**
- **Calls Queued -** calls that entered the queue
- **Calls Answered -** calls that entered the queue and were subsequently answered by an agent
- **Calls Abandoned 0 - X sec -** the # of queued calls that abandoned during the Abandoned Time Threshold
- **Calls Abandoned > X sec -** the # of queued calls that abandoned after waiting > Abandoned Time Threshold
- **% Total Abandoned Calls -** # queued calls that eventually abandoned divided by the # queued calls
- **% Abandoned > X sec -** the % of queued calls that abandoned during the Abandoned Time Threshold

- **Total Waiting Time -** for all queued calls, this is the cumulative queue time plus offered time.
- **Average Wait Time -** the Total Wait Time divided by the # of calls included in that calculation
- **Total Queue Time (sec) -** for all queued calls, this is the sum of time spent in the queue (excluding ring time / offer time)
- **Queue Time 0 – X sec -** the # of queued calls where queue time plus ring & offer time is < Queue Time Range Threshold 1
- **Queue Time X - Y sec -** the # of queued calls where queue time plus ring & offer time is between Queue Time Range Threshold 1 and Queue Time Range Threshold 2
- **Queue Time > Y sec -** the # of queued calls where queue time plus ring & offer time is >

Queue Time Range Threshold 2

- **Average Speed of Answer -** for all queued calls that were answered (and NOT placed on hold by an agent within the first 60 seconds of the call) this is the sum of their queue time plus ring & offer time

- **Maximum Speed of Answer -** for all queued calls, this is the longest amount of time an interaction waited in the queue

- **Total Talk Time (sec) -** for all queued calls that were answered, this is the sum of talk time and hold time

- **Average Talk Time (sec) -** for all queued calls that

were answered, this is the (sum of talk time and hold time) divided by the # of queued calls that were answered

- **Agent Calls Transferred -** The number of interactions that were answered and then transferred (internal or external) by the agent to any other destination.

- **Agent Staffed -** the # of agents that were not in an Offline state during the time period

- **Agents Available -** the # of agents that had at least 1 second of Ready time during the time period

2.7   Customer Contact Center Reports

Report 7.01 - Customer Experience

Parameters:

- **Customer Database** – source database

- **Time Zone** - customer's time zone by Default

- **Manual Start Date**

- **Manual End Date**

- **Period -** Choices are Custom, Last Hour, Today, Yesterday, Last Week, This Month, Last month, Last Year, This Year, Last 7, 14, 21 or 30 Days

- **Display Language**

- **Calculated Start Period**

- **Calculated End Period**

- **Business Process –** multi-value parameter

- **Media Channel**

- **Report Type –** Choices are Cumulative, Hour Interval, or Quarter of an Hour Interval

- **Summary Section –** Choices are None, Month to Date, and Year to Date

- **Enable Pagination**

Fields:

- **Inbound Interactions -** The number of inbound customer interactions that entered this BP

- **Interactions Queued -** The number of interactions that entered the queue excluding any non-live calls

(Callbacks or Preview Dialer calls) or any rescheduled (Callback) emails.

- **Service Level -** The overall weighted % of inbound interactions that entered this BP, queued (across any channel), and achieved the intended service goal (** excludes any calls or chats that meet the Short Abandon threshold **)

- **Callbacks Requested (NonQueue) -** – All other callback requests that are not Callback Requests in queue, can include but not limited to Agent created, web callback, Channel flow, etc

- **Voicemails Received -** For any interactions that entered the queue, the number of callers that left a voicemail instead of speaking with an agent

- **Calls Transferred Externally -** The number of interactions transferred outside ECS for handling (to a 3rd party phone number)

- **Calls Hung Up By Caller -** The number of callers that hung up before reaching any final destination

- **Calls Disconnected By System -** The number of calls that were terminated by an activity in the call flow

- **Average Speed of Answer -** For answered interactions, the average amount of time the interaction waited before an agent answered that includes queue time and ring time

- **Calls Abandoned -** For any calls that entered the queue, the number of inbound customer calls where the caller hung up before reaching any other final destination

- **Answer Rate -** The percentage of inbound interactions that entered the queue and were answered by an

agent (** excludes any calls or chats that meet the Short Abandon threshold **)

- **Average Talk Time -** The average amount of time that callers are on the phone actively speaking with an agent

- **Callbacks Requested (Queue) -** A callback created in a BP flow after the caller was in queue and selected not to continue waiting and opt for a callback

- **Max Delay -** For any interactions that entered the queue, the maximum amount of time that an interaction waited prior to reaching their final destination (answered, abandoned, or overflowed)

- **Outbounds -** The number of outbound calls placed outside of the organization by agents on behalf of this BP (Outgoing External Interactions)

- **Staffed Agents -** the # of agents that were not in an Offline state during the time period

- **Emails Rescheduled** - For any emails that entered the queue, the number of emails that were manually scheduled by an agent to be answered at a later time

- **Emails Handled** - The number of emails handled by an agent. This includes both queued emails and those rescheduled by an agent

- **Emails Remaining** - The number of emails that remained in the queue at the end of the customer's day.

- **Average Agent Response (Chat)** - The average amount of time customers waited after they submitted a message in the chat window until the agent responded.

Report 7.02 - Customer Experience Trends

Parameters:

- **Customer Database** – source database

- **Time Zone** - customer's time zone by Default

- **Manual Start Date**

- **Manual End Date**

- **Period -** Choices are Custom, Last Hour, Today, Yesterday, Last Week, This Month, Last month, Last Year, This Year, Last 7, 14, 21 or 30 Days

- **Display Language**

- **Calculated Start Period**

- **Calculated End Period**

- **Business Process –** multi-value parameter

- **Media Type**

- **Period Delimiter** – choices are hour, day, week, or month. This determines the level of granularity of the x-axis.

an agent

Fields:

- **Queued Calls -** The number of calls that entered the queue excluding any non-live call (a caller didn't initiate that interaction) such as Callbacks or preview dialer calls.

- **Service Level -** The percentage of inbound customer calls that entered the queue and were answered by an agent within the specified goal (seconds).

- **Answer Rate -** The percentage of inbound customer calls that entered the queue and were answered by

- **Average Wrap-Up Time -** For answered calls, the average amount of time that agents spent in Wrap Up

- **Average Hold Time -** For answered calls, the average amount of time that agents spent with callers on Hold

- **Average Talk Time -** For answered calls, the average amount of time that agents were actively speaking with callers

- **Average Speed of Answer -** For answered calls, the average amount of time a caller waited before an agent answered that includes queue time and ring time

- **Queued Emails -** The number of emails that entered the queue excluding any "rescheduled" (or Callback) emails

- **Backlog -** The number of emails that remained in the queue at the end of the customer's day

- **Average Email Time -** The average amount of time an agent spends on an email response

- **Queued Chats -** The number of web chats that entered the queue

- **Average Chat Time** - The average amount of time an agent spends on an email response
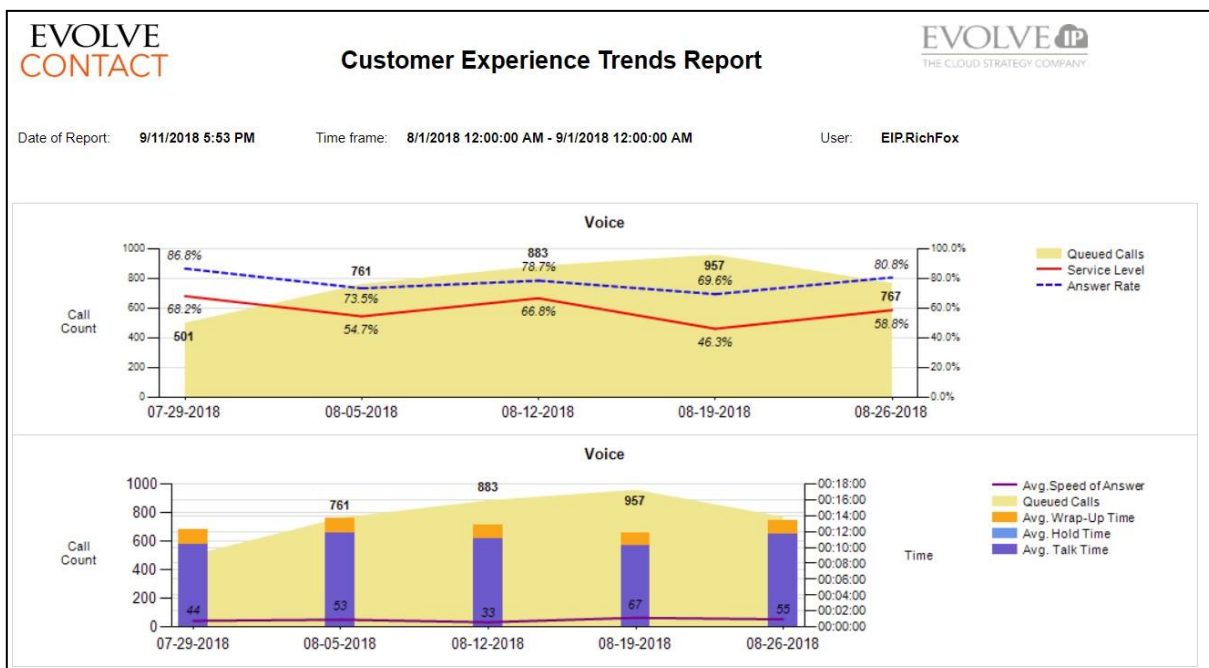

Report 7.03 - Contact Center Performance

Fields:

customer calls that entered the

- **Date**

- **Interval**

- **Calls Queued -** The number of calls that entered the queue excluding any non-live call (a caller didn't initiate that interaction) such as Callbacks or Preview Campaign calls.

- **Calls Answered** - The number of queued calls that were answered by agent.

- **Answer Rate -** The percentage of inbound customer calls that entered the queue and were answered by an agent. ** excludes any calls or chats that meet the Short Abandon threshold **

- **Calls Abandoned -** For any calls that entered the queue, the number of inbound customer calls where the caller hung up before reaching any other final destination.

- **Abandonment Rate (%) -** The number of abandons / number of queued interaction of that type (Chat and Telephony).

- **Average Abandon Time -** For abandoned calls, the average amount of time a caller waited before hanging up.

- **Calls Overflowed -** For any calls that entered the queue, the number of inbound customer calls where the call reached a final destination other than the following: answered by an agent or abandoned by the customer.

- **Voicemails Received -** For any calls that entered the queue, the number of callers that left a voicemail instead of speaking with an agent.

- **Calls Answered Within Service Level -** The number of inbound

interval divided by total handling time (Talk + Hold + Wrap Up) for all agents in that time interval.

queue and were answered by an agent within the specified goal (seconds).

- **Service Level -** The percentage of inbound interactions that entered the queue and were answered by an agent within the specified goal (seconds). ** excludes any calls or chats that meet the Short Abandon threshold **

- **% of Intervals Meeting Service Level -** The percentage of the period intervals that achieved SL Goal parameter value.

- **Average Speed of Answer -** For answered calls, the average amount of time a caller waited before an agent answered that includes queue time and ring time.

- **Average Talk Time -** For answered calls, the average amount of time that agents were actively speaking with callers.

- **Average Hold Time -** the average amount of time a caller was placed on hold by an agent

- **Average Wrap-Up Time -** For answered calls, the average amount of time that agents spent in Wrap Up

- **Average Handle Time (AHT) –** The sum of Talk + Hold + Wrap Up / The count of queued calls that were answered.

- **Talk Time % -** Total Talk time for all agents during this interval divided by total handling time (Talk + Hold + Wrap Up) for all agents in that time interval.

- **Hold % -** Total Hold time for all agents during this

- **Wrap Up %** - Total Wrap Up time for all agents during this interval divided by total handling time (Talk + Hold + Wrap Up) for all agents in that time interval.

- **Callbacks Requested (Queue)** – A callback created in a BP flow after the caller was in queue and selected not to continue waiting and opt for a callback

- **Callbacks Requested (Non-Queue)** – All other callback requests that are not Callback Requests in queue, can include but not limited to Agent created, web callback, Channel flow, etc

- **Callbacks Completed** – the number of Callbacks completed.

- **Calls/Emails/Chats Missed** – the number of interactions that were delivered to a Ready agent and not answered.

- **Calls/Emails/Chats Transferred by Agent** - The number of interactions that were answered and then transferred (internal or external) by the agent to any other destination.

- **Calls Transferred by Agent %** - The number of Calls Transferred by agents divided by the number of Calls Answered - available for Emails and Chats transferred

- **Longest Wait** - For any calls that entered the queue, the maximum amount of time that a caller waited prior to reaching their final destination (answered, abandoned, or overflowed).

- **Agent Outbound External Calls** - The number of outbound calls placed outside of the organization by

agents on behalf of this BP (Outgoing External Interactions)

- **Staffed Agents** - the # of agents that were not in an Offline state during the time period

- **Emails Queued** - The number of emails that entered the queue during the specified time period. This excludes any "rescheduled"emails.

- **Emails Answered** - The number of emails that answered by an agent.

- **Emails Overflowed** - For any emails that entered the queue, the number of inbound customer emails where the email reached a final destination other than the following: answered by an agent.

- **Emails Rescheduled** - For any emails that entered the queue, the number of emails that were manually scheduled by an agent to be answered at a later time.

- **Backlog** - The number of emails that remained in the queue at the end of the customer's day.

- **Average Email / Chat Time** - The average amount of time an agent spends on an email response

- **Chats Overflowed** - For any chats that entered the queue, the number of inbound customer chats where the chat reached a final destination other than the following: answered by an agent or abandoned by the customer.

- **Average Agent Response (Chat)** The average amount of time customers waited after they submitted a message in the chat window until the agent responded.

Report 7.04 – Abandoned Interaction Report

Parameters:

- **Customer Database** – source database
- **Time Zone** - customer's time zone by Default
- **Manual Start Date**
- **Manual End Date**
- **Period –** Choices are Custom, Last Hour, Today, Yesterday, Last Week, This Month, Last month, Last Year, Last 7, 14, 21 or 30 Days
- **Display Language**

- **Calculated Start Period**
- **Calculated End Period**
- **Business Process –** multi-value parameter
- **Media Channel –** multi-value parameter
- **Report Type –** Choices are Cumulative, Hour Interval, or Quarter of an Hour Interval
- **Show Empty Rows**
- **Abandon Threshold 1-5**

Fields:

- **Date**
- **Interval**
- **Calls Queued -** The number of calls that entered the queue excluding any non-live call (a caller didn't initiate that interaction) such as Callbacks or Preview Campaign calls.
- **Calls Answered** - The number of queued calls that were answered by agent.
- **Service Level -** The percentage of inbound interactions that entered the queue and were answered by an agent within the specified goal (seconds). ** excludes any calls or chats that meet the Short Abandon threshold **

- **Calls Abandoned -** For any calls that entered the queue, the number of inbound customer calls where the caller hung up before reaching any other final destination.
- **Average Abandon Time –** the average amount of time an interaction waited in queue before abandoning
- **Calls/Chat Abandoned Threshold 1 –** Number of abandoned interactions in the queue between 0 seconds and threshold 1
- **% Calls/Chat Abandoned Threshold 1 -** % of queued interactions in the queue that abandoned between 0 seconds and threshold 1

- **Calls/Chat Abandoned Threshold 2 -** Number of abandoned interactions in the queue between 0 seconds and threshold 2

- **% Calls/Chat Abandoned Threshold 2 -** % of queued interactions in the queue that abandoned between 0 seconds and threshold 2

- **Calls/Chat Abandoned Threshold 3 -** Number of abandoned interactions in the queue between 0 seconds and threshold 3

- **% Calls/Chat Abandoned Threshold 3 -** % of queued interactions in the queue that abandoned between 0 seconds and threshold 3

- **Calls/Chat Abandoned Threshold 4 -** Number of abandoned interactions in the queue between 0 seconds and threshold 4

- **% Calls/Chat Abandoned Threshold 4 -** % of queued interactions in the queue that abandoned between 0 seconds and threshold 4

- **Calls/Chat Abandoned Threshold 5 -** Number of abandoned interactions in the queue between 0 seconds and threshold 5

- **% Calls/Chat Abandoned Threshold 5 -** % of queued interactions in the queue that abandoned between 0 seconds and threshold 5

Report 7.05 – Contact Center Performance Report by Demand

Parameters:

- **Customer Database** – source database

- **Time Zone** - customer's time zone by Default

- **Manual Start Date**

- **Manual End Date**

- **Period -** Choices are Custom, Last Hour, Today, Yesterday, Last Week, This Month, Last month, Last Year, Last 7, 14, 21 or 30 Days

- **Display Language**

- **Calculated Start Period**

- **Calculated End Period**

- **Business Processes -** multi-value parameter

- **SL Goal % -** the target Service Level goal for each interval.

- **Summary Section -** Choices are None or Month to Date

- **Demands -** multi-value parameter

- **Media Channel -** multi-value parameter

- **Report Type -** Choices are Cumulative, Hour Interval, or Quarter of an Hour Interval

- **Enable Pagination**

- **Show Empty Rows**

Fields:

- **Business Process Name**

- **Calls Queued -** The number of calls that entered the queue excluding any non-live call (a caller didn't initiate that interaction) such as Callbacks or Preview Campaign calls.

- **Calls Answered** - The number of queued calls that were answered by agent.

- **Answer Rate -** The percentage of inbound customer calls that entered the queue and were answered by an agent. ** excludes any calls or chats that meet the Short Abandon threshold **

- **Calls Abandoned -** For any calls that entered the queue, the number of inbound customer calls where the caller hung up before reaching any other final destination.

- **Abandonment Rate (%) -** The number of abandons / number of queued interaction of that type (Chat and Telephony).

- **Average Abandon Time -** For abandoned calls, the average amount of time a caller waited before hanging up.

- **Calls Overflowed -** For any calls that entered the queue, the number of inbound customer calls where the call reached a final destination other than the following: answered by an agent or abandoned by the customer.

- **Voicemails Received -** For any calls that entered the queue, the number of callers that left a voicemail instead of speaking with an agent.

- **Calls Answered Within Service Level -** The number of inbound customer calls that entered the queue and were answered by an agent within the specified goal (seconds).

- **Service Level -** The percentage of inbound interactions that entered the queue and were answered by an agent within the specified goal (seconds). ** excludes any calls or chats that meet the Short Abandon threshold **

- **% of Intervals Meeting Service Level -** The percentage of the period intervals that achieved SL Goal parameter value.

- **Average Speed of Answer -** For answered calls, the average amount of time a caller waited before an agent answered that includes queue time and ring time.

- **Average Talk Time -** For answered calls, the average amount of time that agents were actively speaking with callers.

- **Average Hold Time -** the average amount of time a caller was placed on hold by an agent

- **Average Wrap-Up Time -** For answered calls, the average amount of time that agents spent in Wrap Up

- **Average Handle Time (AHT) –** The sum of Talk + Hold + Wrap Up / The count of queued calls that were answered.

- **Talk Time % -** Total Talk time for all agents during this interval divided by total handling time (Talk + Hold + Wrap Up) for all agents in that time interval.

- **Hold % -** Total Hold time for all agents during this interval divided by total handling time (Talk + Hold + Wrap Up) for all agents in that time interval.

- **Wrap Up % -** Total Wrap Up time for all agents during this interval divided by total handling time (Talk + Hold + Wrap Up) for all agents in that time interval.

- **Callbacks Requested (Queue) –** A callback created in a BP flow after the caller was in queue and selected not to continue waiting and opt for a callback

- **Callbacks Requested (Non-Queue) –** All other callback requests that are not Callback Requests in queue, can include but not limited to Agent created, web callback, Channel flow, etc

- **Callbacks Completed –** the number of Callbacks completed.

- **Calls/Emails/Chats Missed –** the number of interactions that were delivered to a Ready agent and not answered.

- **Calls/Emails/Chats Transferred by Agent -** The number of interactions that were answered and then transferred (internal or external) by the agent to any other destination.

- **Calls Transferred by Agent % -** The number of Calls Transferred by agents divided by the number of Calls Answered - available for Emails and Chats transferred

- **Longest Wait -** For any calls that entered the queue, the maximum amount of time that a caller waited prior to reaching their final destination (answered, abandoned, or overflowed).

- **Agent Outbound External Calls -** The number of outbound calls placed outside of the organization by agents on behalf of this BP (Outgoing External Interactions)

- **Staffed Agents -** the # of agents that were not in an Offline state during the time period

2.8 Calls Reports

Report 8.01 – Calls Performance by Business Process and Destinations

Parameters:

- **Customer Database** – source database

- **Time Zone** - customer's time zone by Default

- **Manual Start Date and Time**

- **Manual End Date and Time**

- **Period**

- **Display Language**
- **Calculated Start Period**
- **Calculated End Period**
- **Business Process –** multi-value parameter

- **Call Type**
- **Group By Destination**
- **Filter Destination**
- **Origin**
- **Time Slice**

Fields:

- **Calls Inbound –** Total inbound calls that entered the BP

- **Calls Queued -** The number of calls that entered the queue excluding any non-live call (a caller didn't initiate that interaction) such as Callbacks or preview dialer calls.

- **Calls Answered -** The number of queued calls that were answered by agent

- **Answer Rate -** The percentage of inbound customer calls that entered the queue and were answered by an agent

- **Calls Abandoned -** For any calls that entered the queue, the number of inbound customer calls where the caller hung up before reaching any other final destination

- **Average Abandon Time -** For abandoned calls, the average amount of time a caller waited before hanging up

- **Longest Wait -** For any calls that entered the queue, the maximum amount of time that a caller waited prior to reaching their final destination (answered, abandoned, or overflowed)

- **Max Queued –** Max queued calls for this time slice

- **Average. Speed of Answer -** For answered calls, the average amount of time a caller waited before an agent answered that

- **Average Talk Time -** For answered calls, the average amount of time

that agents were actively speaking with callers

- **Average Wrap-Up Time -** or answered calls, the average amount of time that agents spent in Wrap Up

- **Callbacks Requested -** For any calls that entered the queue, the number of callers that opted-in to a callback instead of waiting for an agent

- **Calls Overflowed -** For any calls that entered the queue, the number of inbound customer calls where the call reached a final destination other than the following: answered by an agent or abandoned by the customer.

- **Voicemails Received -** For any calls that entered the queue, the number of callers that left a voicemail instead of speaking with an agent

- **Transferred Out External –** Total calls that were transferred out to an external number

- **Transferred Out Internal –** Total calls that were transferred to an internal entity (agent, BP or Channel)

- **Calls Disconnected by System -** The number of calls that were terminated by an activity in the call flow

- **Calls Hung up by Caller -** The number of callers that hung up before reaching any final destination

- **Staffed Agents -** the # of agents that were not in an Offline state during the time period

Date of Report: 1/28/2019 4:19 PM   Time frame: **1/21/2019 12:00:00 AM - 1/25/2019 12:00:00 AM**   Created by: **plab.Supervisor1**

2.9   Post Call Survey (PCS) Reports

Report 9.01 – PCS Detail

Parameters:

- **Customer Database** – Source database

- **Time Zone** – The time zone of the customer by default

- **Manual Start Date and Time**

- **Manual End Date and Time**

- **Period**

- **Calculated Start Period**
- **Calculated End Period**
- **Business Process –** multi-value parameter
- **Origin**

Fields:

- **Start Time –** The date and time that the interaction between the Agent and customer started.

- **End Time –** The date and time that the Agent disconnected the interaction.

- **Opt in Business Process-** The Business Process in which the customer opted into the survey.

- **Survey Name –** The name of the survey in ECS Setup.

- **Agent –** The name(s) of Agents in the interaction for a survey.

- **First Name –** First name of the survey recipient.

- **Last Name –** Last name of the survey recipient.

- **Opt in Business Process** - The business process that the customer was in when opting into the survey

- **Agents**

- **Include CRM Data**

- **Queue Time –** The amount of time the customer waited before the interaction started.

- **Talk Time –** The amount of time that a customer interacts with an Agent in an active interaction (telephony or chat) including transfers and consults.

- **Hold Time –** The amount of time that a customer was waiting to talk with an Agent in the Opt in Business Process of the interaction.

- **Question –** The name of the question in ECS Setup.

- **Answer –** The response to the question. This is either:

  -The numeric digit selected

  -The recorded transcribed content

  -"Timeout" if the timeout was reached with no response-

  -"Invalid" if an invalid key was selected

  -"Skip" if the Skip key was selected

Report 9.02 – PCS Summary Agent

Parameters:

- **Customer Database** – Source database

- **Time Zone** – The time zone of the customer by default

- **Manual Start Date and Time**

- **Manual End Date and Time**

- **Period**

- **Calculated Start Period**

- **Calculated End Period**

- **Opt in Business Process** - The business process that the customer was in when opting into the survey

- **Agents**

Fields:

- **All Business Processes –** The average of all scores received from each Agent in all Opt in Business Processes with a survey. The Agent average for a survey is calculated by taking the sum of each survey answer and dividing the sum by the number of questions with a selection. The average for all Business Processes is the sum of all averages that an Agent had for a specific survey in all Business Processes divided by the total number of specific surveys in all Business Processes.

- **Agent –** The name(s) of Agents in the interaction for a survey. All Agents included in an interaction are listed.

- **Business Process –** The average of all scores received from each Agent in an Opt in Business Process with a survey. The Agent average for a survey is calculated by taking the sum of each survey answer and dividing the sum by the number of questions with a selection. The average for a Business Process is the sum of all averages that an Agent had for a specific survey in a Business Process divided by the total number of specific surveys in that Business Process.

- **Survey Name -** The name of the survey in ECS Setup.

Report 9.03 – PCS Summary BP

Parameters:

- **Customer Database** – Source database
- **Time Zone** – The time zone of the customer by default
- **Calculated Start Period**
- **Calculated End Period**
- **Agents**

- **Manual Start Date and Time**
- **Manual End Date and Time**
- **Period**
- **Opt in Business Process**- The business process that the customer was in when opting into the survey

Fields:

- **All Business Processes –** The average of all scores received from each Agent in all Opt in Business Processes with a survey. The Agent average for a survey is calculated by taking the sum of each survey answer and dividing the sum by the number of questions with a selection.

- **Business Process –** The average of all scores received from each Agent in an Opt in Business Process with a survey. The Agent average for a survey is calculated by taking the sum of each survey answer and dividing the sum by the number of questions with a selection.

- **Survey Name -** The name of the survey in ECS Setup.

3.   Field Definitions

Field	Interaction Type(s)	Definition	Numerator	Denominator
Inbound Interactions	Callback, Chat, Email, Fax, Telephony	the number of inbound customer interactions that entered this BP		
Callbacks Completed	Business Process: Telephony	the number of callbacks that were successfully handled		
Calls Abandoned	Business Process: Telephony	the number of callers that hung up before reaching any final destination		
Calls Disconnected	Business Process: Telephony	the number of calls that were terminated by an activity in the call flow		
Calls Not Queued	Business Process: Telephony	the number of calls received that never entered a Queue step		
Abandonment Rate (%)	Business Process: Telephony and Chat	The number of abandons / number of queued interaction of that type		
Outbound Calls	Business Process: Outgoing External	the number of outbound calls placed outside of the organization by agents on behalf of this BP (Outgoing External Interactions)		
Service Level	Business Process: Incoming	the overall weighted % of inbound interactions that entered this BP, queued (across any channel), and achieved the intended goal	# of interactions (across all inbound interaction types) that queued and were answered within the defined goal	# of interactions that were queued minus any interactions that are excluded based upon defined criteria associated with each channel
Calls Transferred Externally	Business Process: Telephony	the number of interactions transferred outside ECS for handling (to a 3rd party phone number)		
Answer Rate	Voice Queue: Telephony	the percentage of inbound customer calls that entered the queue and were answered by an agent	the number of inbound customer calls that entered the queue (minus any calls that are considered service level exclusions) and were answered by an agent	the number of inbound customer calls that entered the queue (minus any calls that are considered service level exclusions)
Calls Transferred by Agent	Voice Queue: Telephony	The number of answered calls which were then transferred out to any other destination (External DID, Agent, Channel, BP, HPBX user)		
Calls Transferred by Agent %	Voice Queue: Telephony	The number of Calls Transferred by agents divided by the number of Calls Answered		

Average Abandon Time (AAT)	Voice Queue: Telephony	for abandoned calls, the average amount of time a caller waited before hanging up	the total amount of wait time in the queue for inbound customer calls that entered the queue and abandoned prior to reaching an agent (minus the wait time for any calls that are considered service level exclusions)	the number of inbound customer calls that entered the queue and abandoned prior to reaching an agent (minus any calls that are considered service level exclusions)
Average Hold Time	Voice Queue: Telephony	for answered calls, the average amount of time a caller was placed on hold by an agent	for answered calls that were placed on hold by an agent, the total amount of hold time those callers experienced	the number of answered calls that were placed on hold by an agent
Average Handle Time (AHT)	Voice Queue: Telephony	Calculated as sum of talk + hold + wrap/The count of queued calls that were answered		
Average Speed of Answer (ASA)	Voice Queue: Telephony	for answered calls, the average amount of time a caller waited before an agent answered that includes queue time and ring time	the total amount of time that answered calls waited (queue time + ring time)	the number of answered calls
Average Talk Time (ATT)	Voice Queue: Telephony	the average amount of time that callers are on the phone actively speaking with an agent	the total amount of time that answered calls were actively connected to an agent and not placed on hold	the number of answered calls
Callbacks Completed	Voice Queue: Callback, Telephony	the number of telephony callbacks that were completed		
Callbacks Requested	Voice Queue: Telephony	for any calls that entered the queue, the number of callers that opted-in to a callback instead of waiting for an agent		
Calls Abandoned	Voice Queue: Telephony	for any calls that entered the queue, the number of inbound customer calls where the caller hung up before reaching any other final destination		
Calls Overflowed	Voice Queue: Telephony	for any calls that entered the queue, the number of inbound customer calls where the call reached a final destination other than the following: answered by an agent or abandoned by the customer.		
Calls Queued	Voice Queue: Telephony	the number of calls that entered the queue excluding any non-live call (a caller didn't initiate that interaction) such as Callbacks that were requested (to avoid double counting) or preview dialer calls.		
Final Destination	Voice Queue: Telephony	For any calls that entered the queue, the following events are considered a final destination for that interaction: * answered by an agent * abandoned by the customer * becomes a callback request * the interaction is transferred outside ECS for handling (to a 3rd		

		party phone number such as an outsourcer) * customer leaves a voicemail message * interaction is disconnected by the call flow		
Longest Wait	Voice Queue: Telephony	for any calls that entered the queue, the maximum amount of time that a caller waited prior to reaching their final destination (answered, abandoned, or overflowed)		
Service Level (SL)	Voice Queue: Telephony	the percentage of inbound customer calls that entered the queue and were answered by an agent within the specified goal (seconds)	the number of inbound customer calls that entered the queue (minus any calls that are considered service level exclusions) and were answered by an agent in the specified goal (seconds)	the number of inbound customer calls that entered the queue (minus any calls that are considered service level exclusions)
% of Intervals Meeting Service Level	Voice Queue: Telephony	the percentage of 15 minute intervals where the Service Level goal was achieved	the number of 15 minute intervals where a queued call was received and the Service Level goal was met	the number of 15 minute intervals where a queued call was received
Staffed Agents	Voice Queue: Telephony	the # of agents that were not in an Offline state during the time period		
Voicemails Received	Voice Queue: Telephony	for any calls that entered the queue, the number of callers that left a voicemail instead of speaking with an agent		
Total Calls Duration	Voice Queue: Telephony	Total Calls Duration Includes all the call duration regardless of the filters exact start and stop time. It will only look for calls handled within the selected period.	Example: Interaction A started at 13:05:00 and finished at 13:15:00 Interaction B started at 13:19:00 and finished at 13:22:00 Period: 13:10:00 - 13:20:00 Total Calls Duration for A: 10 mins, for B: 3 mins Total Calls Prorated Duration for A: 5 mins, for B: 1 mins	
Total Calls Prorated Duration	Voice Queue: Telephony	Prorated call durations start before the Start time filter or end after the End time filter. Prorated duration will subtract the time that is outside the period filter from the call duration. Provides adjusted minutes count for a specific period. The calculation adjusts to the customer time zone.	Example: Interaction A started at 13:05:00 and finished at 13:15:00 Interaction B started at 13:19:00 and finished at 13:22:00 Period: 13:10:00 - 13:20:00	

			Total Calls Duration for A: 10 mins, for B: 3 mins Total Calls Prorated Duration for A: 5 mins, for B: 1 mins	
Talk Time %	Voice Queue: Telephony	Total Talk time for all agents during this interval divided by total handling time (talk+hold+wrap) for all agents in that time interval		
Hold Time %	Voice Queue: Telephony	Total Hold time for all agents during this interval divided by total handling time (talk+hold+wrap) for all agents in that time interval		
Wrap Up Time %	Voice Queue: Telephony	Total Wrap Up time for all agents during this interval divided by total handling time (talk+hold+wrap) for all agents in that time interval		
Answer Rate	Chat	the percentage of inbound customer chats that entered the queue and were answered by an agent	the number of inbound customer chats that entered the queue (minus any chats that are considered service level exclusions) and were answered by an agent	the number of inbound customer chats that entered the queue (minus any chats that are considered service level exclusions)
Average Agent Response	Chat	the average amount of time customers waited after they submitted a message in the chat window until the agent responded	the total amount of time that answered chats were "idle" from the time the customer sent a chat message until the agent responded	the total number of messages sent by customers inside a chat session (each chat session will typically have multiple messages sent by the customer) for all answered chat sessions
Average Chat Time	Chat	the average amount of time an agent spends on a chat interaction	the total amount of time that answered chats were "worked" by an agent from the time the chat interaction was delivered to an agent until the chat session ended	the number of answered chats
Average Speed of Answer	Chat	the average amount of time from when an chat was received from the customer until an agent responded	the total amount of time that answered chats waited from the time the customer chat was received until an agent chat response was sent	the number of answered chats
Chats Abandoned	Chat	for any chats that entered the queue, the number of inbound customer chats where the customer terminated their chat session before reaching their destination		
Chats Overflowed	Chat	for any chats that entered the queue, the number of inbound customer chats where the chat reached a final		

		destination other than the following: answered by an agent or abandoned by the customer.		
Queued Chats	Chat	the number of chats that entered the queue		
Longest Wait	Chat	for any chats that entered the queue, the maximum amount of time that a customer waited prior to receiving a chat response from an agent OR abandoned prior to receiving an agent response OR become a callback.		
% of Intervals Meeting Service Level	Chat	the percentage of 15 minute intervals where the Service Level goal was achieved	the number of 15 minute intervals where a queued chat was received and the Service Level goal was met	the number of 15 minute intervals where a queued chat was received
Service Level	Chat	the percentage of inbound customer chats that entered the queue and an agent responded within the specified time goal	the number of inbound customer chats that entered the queue and an agent sent a response within the specified time goal	the number of inbound customer chats that entered the queue
Staffed Agents	Chat	the # of agents that were not in an Offline state during the time period		
Average Email Time	Email	the average amount of time an agent spends on an email response	the total amount of time that answered emails were "worked" by an agent from the time the email interaction was delivered to an agent until they sent a response	the number of answered emails
Average Speed of Answer	Email	the average amount of time from when an email was received during business hours from the customer until an agent responded	the total amount of time that answered emails waited from the time the customer email was received until an agent email response was sent	the number of answered emails
Emails Remaining	Email	the number of emails that remained in the queue at the end of the customer's day (based upon business hours)	the number of emails that remained in the queue waiting for an agent response when the BP closed	
Emails Handled	Email	the number of emails handled by an agent. This includes both queued emails and those rescheduled by an agent.		
Emails Overflowed	Email	for any emails that entered the queue, the number of inbound customer emails where the email reached a final destination other than the following: answered by an agent.		
Emails Rescheduled	Email	for any emails that entered the queue, the number of emails that were manually scheduled by an agent to be answered at a later time		

Longest Wait	Email	for any emails that entered the queue, the maximum amount of time that a customer waited prior to receiving an email response from an agent		
Queued Emails	Email	the number of emails that entered the queue during the specified time period. This excludes any "rescheduled" (or Callback) emails.		
Service Level	Email	the percentage of inbound customer emails that entered the queue and an agent sent an email response within the specified time goal	the number of inbound customer emails that entered the queue and an agent sent an email response within the specified time goal	the number of inbound customer emails that entered the queue
Staffed Agents	Email	the # of agents that were not in an Offline state during the time period		
Busy Time	Agent	Offer Time + Talk Time + Chat Time + Email Time + Fax Time + Wrap-up Time + Hold Time (overlapping interactions will not be accumulated)		
Login Time	Agent	Handle Outgoing Time + Break Time + Back Office Time + Idle Time + Busy Time		
Idle Time	Agent	Agent is in the Ready State and is waiting to receive an interaction		
Occupancy	Agent	((Busy Time divided by (Busy Time + Idle Time))*100		
Handle Time	Agent	Talk Time + Chat Time + Email Time + Fax Time + Wrap Up Time + Hold Time		
Total Online	Agent	The number of agents that logged in during the specified time period		
Total Available	Agent	The number of agents that entered a Ready state during the specified time period		
Occupancy Pct	Agent	The cumulative Occupancy of the Available agents. This is calculated by dividing Busy Time by the sum of (Busy Time + Ready Time)		
Interaction Time	Agent	Offer Time + Talk Time + Chat Time + Email Time + Fax Time + Wrap-up Time + Hold Time (overlapping interactions are accumulated)		Overlapping interactions will accumulate Interaction Time. If an agent is simultaneously, working on multiple interactions, Interaction Time is the sum of the time spent on each individual interaction. The Interaction Time could therefore exceed the agent's Login Time for that period.

4.   Interaction Types

Interaction Type	Description	Media Types	Direction	Additional
Any	Umbrella term that includes all Media Types and Directions	All	Incoming, Outgoing	
Callback	Callback can include OR an inbound voice interaction that either became a callback because the caller opted-in to a callback while in a queue OR an inbound voice interaction became a callback because the agent spoke with the caller and manually scheduled a callback OR Inbound interaction that begins as a web callback request OR an email that is manually rescheduled by the agent for a later response	Telephony, Email	Incoming, Outgoing	Customer can put a link on their website where the customer enters their name and phone number and description and optionally BP. That interaction will immediately be sent to the BP for processing. A Web Callback requests is a Telephony media type.
Callback Telephony	A subset of Callback interactions that only include those for the Telephony media type	Telephony	Incoming	
Campaign	An outbound Campaign interaction initiated by the Dialer.	Telephony	Outgoing	Same as Campaign Telephony
Campaign Telephony	An outbound voice interaction initiated by the Dialer	Telephony	Outgoing	Same as Campaign
Chat	an inbound web chat interaction initiated by a customer OR an internal chat between members of the organization	Chat	Incoming, Outgoing	Outbound chats today would be an outbound internal chat only.
E-mail	an inbound email interaction initiated by a customer OR an outbound response email from an agent to a customer	Email	Incoming, Outgoing	
Fax	Business Process: Telephony	Fax	Incoming	Same as Incoming Fax today. The system expects all faxes to be delivered via email.

				There is no inherent FAX capability in the system.
Incoming	an inbound fax interaction initiated by a customer	All	Incoming	
Incoming Chat	Umbrella term that includes all Incoming interactions across all media types	Chat	Incoming	
Incoming Email	an inbound web chat interaction initiated by a customer	Email	Incoming	
Incoming Fax	an inbound email interaction initiated by a customer	Fax	Incoming	
Incoming Telephony	an inbound call interaction initiated by a customer	Telephony	Incoming	
Internal Messaging (Chat)	a chat interaction between 2 agents	Chat	Incoming, Outgoing	
Outgoing External Mail	an outbound email that is sent to an external address	Email	Outgoing	
Outgoing External Telephony	an outbound call originated by an agent to a number that is external to the organization	Telephony	Outgoing	
Outgoing Internal Telephony	an outbound call originated by an agent to a number that is internal to the organization	Telephony	Outgoing	
Outgoing External	an umbrella term that includes all outgoing interactions across media types sent external to the organization	Telephony, Email	Outgoing	
Outgoing Internal	an umbrella term that includes all outgoing interactions across media types sent internally within the organization	Telephony, Chat	Outgoing	
Telephony	a voice interaction that entered the Business Process. This includes every voice interaction - including AA & IVR & queue & dialer functions & manual outgoing calls initiated by an agent.	Telephony	Incoming, Outgoing	
Transferred	any interaction that is transferred to a secondary destination manually by an agent OR automatically during the call flow	All	Incoming, Outgoing	
Transferred Chat	a chat interaction that is transferred to a secondary destination manually by an agent OR automatically during the call flow	Chat	Incoming	
Transferred E-mail	an email interaction that is transferred to a secondary destination manually by an agent	Email	Incoming	

	OR automatically during the call flow			
Transferred Fax	a fax interaction that is transferred to a secondary destination manually by an agent OR automatically during the call flow	Fax	Incoming	
Transferred In Telephony	Call transferred into this BP from another BP	Telephony	Incoming	
Transferred Out Telephony	Call transferred from this BP to another BP	Telephony	Outgoing
