

ECS Setup: Implementation - Address Book Metadata

Implementation: Address Book Metadata

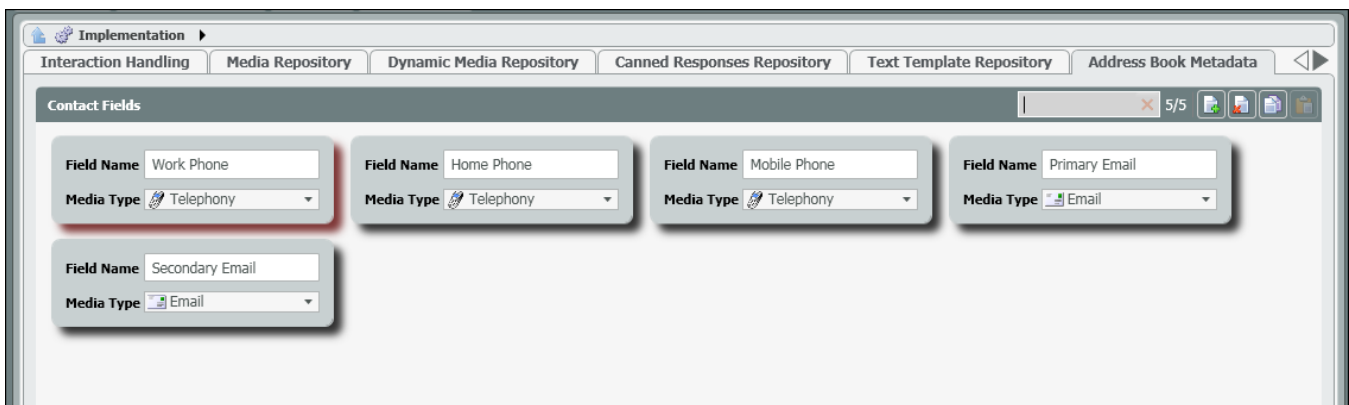

- [Overview](#)
- [How it works](#)
- [Adding a new Address Book Metadata Entry](#)

Overview

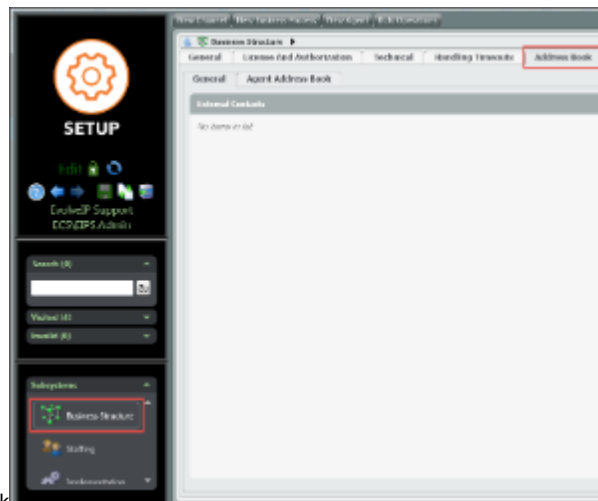

The Address Book Metadata provides five default contact fields that can be used when adding new external contacts in the Business Structure: Address Book. The external contacts will show up in the agent and supervisor contact directory via their App Bar. Additional contact fields can be added if you wish to add other contact information outside of the 5 default entries.

The 5 default contact field entries within the Address Book Metadata are:

1. Work Phone
2. Home Phone
3. Mobile Phone
4. Primary Address
5. Secondary Email

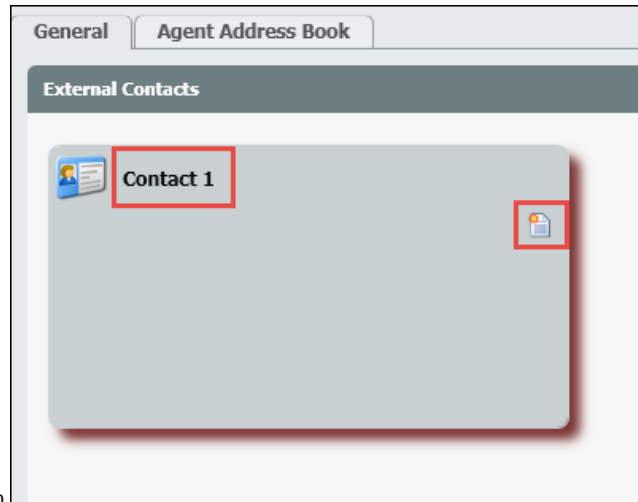

How it works

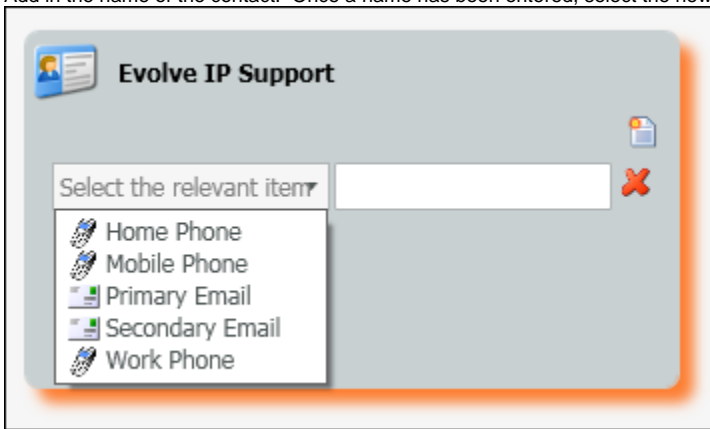

1. Under subsystems, select Business Structure > Address Book
2. Under the general tab, you will see External Contacts. Select the Add New icon to add a new external contact.

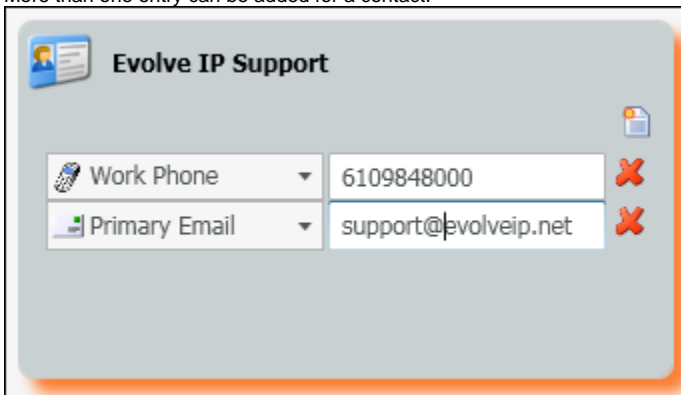

3. A new contact window will open in the External Contacts pane.
4. Add in the name of the contact. Once a name has been entered, select the new contact field icon, shown in the image above.

- 5.
6. Click on the 'select the relevant item drop down'
7. The drop down contains all available contact fields that can be selected for the contact. These available contact fields come from the Address Book Metadata. The above image shows the five default entries mentioned in the overview. If a custom entry is added within the Address Book Metadata, it would also be available within this drop down.
8. Select a relevant item and enter in the phone number or email address in the open field.
9. More than one entry can be added for a contact.

- 10.
11. Once created and deployed, all relevant contact information for the newly created contact will become available to the agents and supervisors in their contact directory found within their App Bar.

Adding a new Address Book Metadata Entry

1. Navigate to Implementation > Address Book Metadata and click on the Add New icon to add a new contact field.

2. A new entry will open in the Contact Field pain.
3. Add the name and Media Type for the entry

A screenshot of a software interface showing a 'Field Name' dropdown menu with 'Secondary Work Phone' selected. Below it, a 'Media Type' dropdown menu is open, displaying options: Chat, Email, Fax, and Telephony. The 'Telephony' option is highlighted with a blue background. The entire interface is enclosed in a light gray box with an orange border.

- 4.
5. Save your new entry. Now if you were to go back into the Business Structure Address Book, you would find Secondary Work Phone as a new contact field entry when creating new external contacts.

A screenshot of a contact form titled 'Evolve IP Support'. The form contains three rows of input fields. The first row is 'Work Phone' with the value '6109848000'. The second row is 'Primary Email' with the value 'support@evolveip.net'. The third row is 'Select the relevant item' with a dropdown menu open. The dropdown menu lists: Home Phone, Mobile Phone, Primary Email, Secondary Email, Secondary Work Phone (highlighted with a red box), and Work Phone. Each row has a red 'X' icon to its right. The form is enclosed in a light gray box with an orange border.
