

Evolved Office: UC-One

Firewall Rules & Policies Update

Updated September 17, 2019

Foreword

This guide is designed to provide firewall recommendations for settings and port openings. Evolve strides to provide the most ideal settings for the most common firewalls. However, knowing the exact settings for customer firewalls, IT vendors, and ISP carriers is the responsibility of the customer and their contracted IT vendors.

Because IP addresses sometimes change, hostnames are shown below. Use a network tool such as nslookup or dig to identify the current IP address assignments. Evolve IP will notify clients when address changes are being made. It is recommended you subscribe to maintenance notifications at https://status.evolveip.net

The following tables list the specific ports required to interact with Evolve IP's network. The UC-One application also relies on common network protocols in your network such as DHCP and DNS.
