

25 DaaS USERS = \$1350 per month
1 VCPU, 3GB RAM

Virtual Data Center = \$600 per month
4GHz, 500 GB of Disk, 16 GB RAM

Benefits of DaaS

- **SIMPLICITY:** Simplified delivery of desktops and applications to end users - Evolve IP takes care of the support, routine upgrades, backups, and virus protection.
- **PRODUCTIVITY:** Accessible from any location on any device, while administrators support and deploy from a centralized location
- **ECONOMICS:** Reduce total cost of ownership by 70 percent through remote trouble shooting, ease of deployment and extended life of older equipment.
- **SCALABILITY:** Add additional resources to the "virtual" PC rather than upgrading expensive equipment.
- **SECURITY:** Secure access to company apps and data across all users, regardless of device

Benefits of Virtual Data Center

- **SIMPLICITY:** Replace multiple on-site servers, support, upgrades and backup with a simple "cloud-sourced" service.
- **PRODUCTIVITY:** Users gain access to virtual servers from any location, while administrators support and deploy from a centralized location.
- **ECONOMICS:** Pay for guaranteed computing resources that are needed at a predictable monthly fee.
- **STABILITY:** Delivered from geographically diverse technology centers, ensuring that cloud services are available regardless of conditions at your location.
- **CONTROL:** Gain unmatched control and point-and-click configuration over all services through vCloud Director Portal.
