

View Catalogs

You can access catalogs shared with you within your organization, public catalogs shared by Evolve IP, and any publicly subscribed catalogs. Catalog access is controlled by catalog sharing, not by the rights in your role. You can access only those catalogs or catalog items that are shared with you.

Procedure

1. On the **Virtual Datacenters** dashboard screen, click the card of the virtual data center you want to explore.
2. From the main menu select **Libraries** and select **Catalogs** from the left panel.
3. Review the catalogs available.

The screenshot displays the Evolve IP vCloud Virtual Data Center dashboard. The top navigation bar includes 'Data Centers', 'Applications', 'Libraries', 'Administration', 'Monitor', and 'More'. The main content area shows the following details:

- Environment:** Sites: 1, Organizations: 1, Virtual Data Centers: 1
- Running Applications:** VMs: 3, vApps: 0
- Used Resources:** CPU: 0 MHz, Memory: 12 GB, Storage: 173 GB

A search bar labeled 'Find by Name' is located on the right. Below this, a card for 'TestAnalytics - VCD01' provides a summary of resource usage:

Applications	CPU	Memory	Storage
0 vApps 3 of 3 Running VMs	0 MHz 8 GHz allocated	12 GB 24 GB allocated	173 GB 250 GB allocated

At the bottom, a 'Recent Tasks' table shows a single task:

Task	Status	Type	Initiator	Start Time	Completion Time
Imported Virtual Application Template Template(8aa959f1c-d2a9-4676-bb6f-09e4ca...	Succeeded	vapptemplate	orgadmin	02/19/2021, 04:45:44 PM	02/19/2021, 04:50:27 PM
