Clearlogin - JWT Apps

In This Article

Overview

Steps to Add a JWT App

Login to the Clearlogin Admin Portal (admin.clearlogin.com)

Select **Apps**

Select **New App Connection**

Select **JWT**

Enter the required information from the following, then Select **Create JWT App**

Display Name: **Name that will appear for users**

Icon: **Add a PNG logo for the App**

Accepted Access Tags: **An Access Group can be added here to limit who sees the App**

MFA Access Tags: **Choose the Access Tags that you would like to trigger an MFA prompt**

Login URL: **URL that users will get redirected to when they select the App (This should be the URL with the Login Form on the page)**

Audience Restriction (This name may vary from vendor to vendor): **Provided by Vendor**

Token Expiration: **The length of time a token will be valid until it expires**

Enabled: **Will turn the App On/Off**

Admins Only?: **If Enabled, will only allows Tenant Admins to see the App**

Hide on Dashboard?: **If Enabled, the App will not appear on the dashboard**

Once the app is created, select Edit to Add your secret (Typically provided by the Vendor)
