

Webex Admin - Control Hub Overview

Overview - Webex Control Hub

You can view the licenses across all your services. See see notifications to stay updated with new functions to set up in Control Hub.

When you get started with your organization in Control Hub, we recommend adding users to join Webex via the U flow verification link. Encourage them to use the services you provide, and submit feedback. At any point, you can always add more users via ossmosis and have Evolve enable webex services.

It is recommend that you use the latest desktop version of Google Chrome, Microsoft Edge, or Mozilla Firefox to access Control Hub.* Other browsers may produce unexpected results

Control Hub doesn't support Internet Explorer.

Control Hub isn't designed for mobile devices.

* Control Hub supports Microsoft Edge Version 79.0.309.71 (Official build) (64-bit) and later.

[All system requirements can be viewed here](#)

To get started:

After the admin has completed provisioning the webex seat via the verification link, they will be able to access the webex Control Hub site for their ORG.

Control Hub Admin Link [HERE](#)

The first user provisioned for each customer org will be provisioned as the Full Admin for that org.

The screenshot shows the 'Profile' page in the Webex Control Hub admin interface. At the top, there are tabs for 'Profile', 'General', 'Meetings', 'Calling', 'Messaging', 'Hybrid Services', and 'Devices'. Below the tabs, there is a back arrow and the word 'Profile'. The main content area is titled 'Administrator roles' and is divided into three sections: 'Organizational', 'Functional', and 'Services'. Each section contains a list of roles with checkboxes and information icons.

Category	Role	Status
Organizational	Organization administrator	<input checked="" type="checkbox"/>
	Full administrator ⓘ	<input checked="" type="radio"/>
	Read-only administrator ⓘ	<input type="radio"/>
Functional	Support administrator ⓘ	<input checked="" type="checkbox"/>
	User and device administrator ⓘ	<input checked="" type="checkbox"/>
	Device administrator ⓘ	<input checked="" type="checkbox"/>
	Compliance officer ⓘ	<input type="checkbox"/>
	Advanced troubleshooting access ⓘ	<input type="checkbox"/>
Services	Contact center service administrator	<input type="checkbox"/>
	Webex site administrator roles Edit	<input checked="" type="checkbox"/>

What settings are Restricted?

Restricted Mode is enabled so that EIP can continue to manage the Billable Settings and minimize support issues that may inadvertently be created when making changes.

Restricted by Partner Mode

Enable Restricted by Partner mode 

WHAT: A setting that restricts changes that can be made by customer admins so that they cannot:

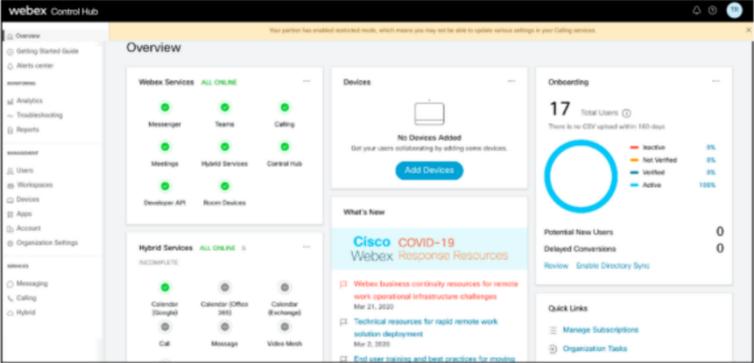

- Make changes to Account Name
- Make changes to billable settings- Add Users, Change License types, Change User services,
- Edit Directory Sync settings
- Make changes to provisioning and authentication settings
- Make changes to the way calling is configured and phone numbers

What Can I do as a Webex Admin for my ORG?

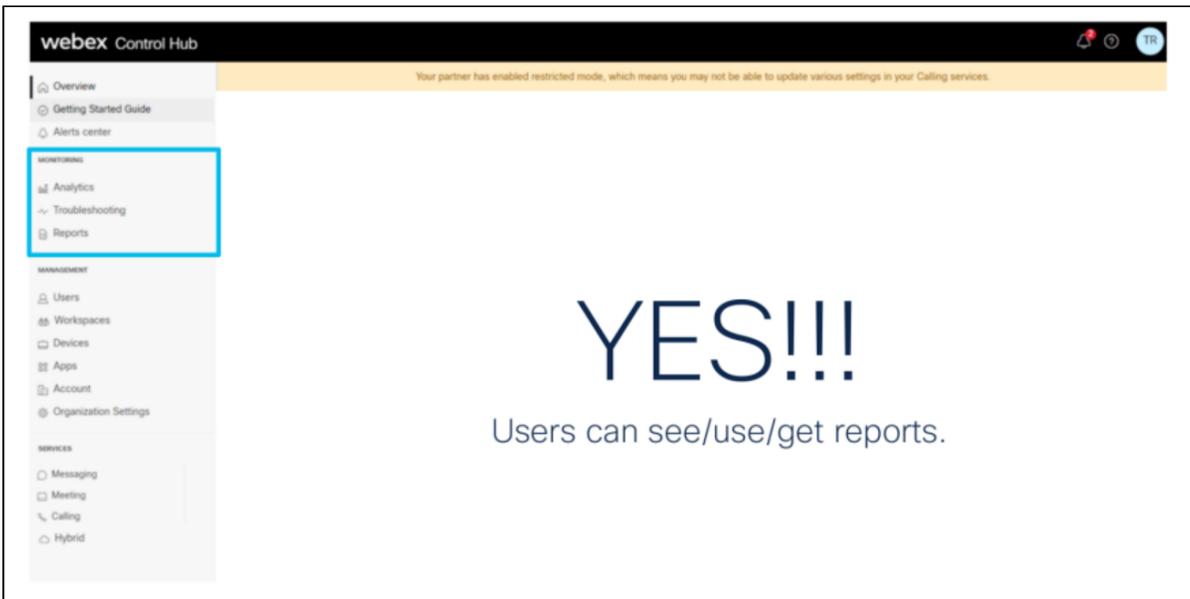

What can the customer admin do?

- See their users status (Active, Verified, Not Verified, Inactive)
- See Webex Services status
- Access troubleshooting
- Access Analytics and reports
- Manage Devices
- Manage Webex App settings for their org
- Manage Meeting Sites settings

Customer admin: (Control Hub) admin.webex.com

- Analytics
- troubleshooting
- Reports

What User settings can I change?

- application passwords and user seats will still need to be created via ossmosis.

The screenshot shows the Webex Control Hub interface with the 'Users' section selected in the navigation menu. A table is displayed with the following columns: 'Setting' and 'Can Admin Change?'. The table lists various user settings and their administrative changeability.
