

List of Webex Supported Headsets

Webex App | Details about headset support

In your meetings and calls, you can use one of our Cisco headsets or the third-party headsets that are certified for call controls.

Cisco headsets

Here are the Cisco headsets we support. For tips on setting up and using these headsets, take a look at the info for your model:

- [Bang & Olufsen Cisco 980](#)
- [Cisco Headset 320 Series](#)
- [Cisco Headset 520 Series](#)
- [Cisco Headset 530 Series](#)
- [Cisco Headset 560 Series](#)
- [Cisco Headset 720 Series](#)
- [Cisco Headset 730](#)

When your Cisco headset has an upgrade available, you get notified right in the app.

See the [Cisco Headset Compatibility Guide](#) for detailed information on Cisco headset integration with Webex App.

Third-party headsets

| Headset model | Minimum firmware version |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
