

Microsoft CSP - Microsoft 365 Licensing in VDI

In This Article

- Overview
- Windows 10/11 Enterprise
- Office Suite of Apps
- Which Products Should I Choose?
- Product Support Matrix

Overview

This article will help you understand Microsoft's licensing rules when licensing a user with Microsoft 365 subscription products in a virtual desktop. At the end of this article there is a table listing each Microsoft subscription product and whether it's supported in a virtual desktop.

Windows 10/11 Enterprise

NOTE

Currently, Evolve IP's Desktop as a Service (DaaS) product line can only provide dedicated Windows 10 virtual desktops. Windows 11 is currently not supported in the Evolve IP shared DaaS environment. However, Windows 11 is currently being tested and should become available in 2024.

In a virtual environment:

- The Windows 10/11 virtual desktop is not licensed. Instead, the user accessing the Windows 10 /11 virtual desktop is licensed.
- The user account is licensed by purchasing one of Microsoft's subscription products in your 365 tenant.
- The user account can be created in the 365 tenant, or be synced to the 365 tenant from a local Active Directory.
- A licensed user has the permissions to access up to 5 virtual desktops (physical machines like laptops or desktops are eligible too).

Microsoft has three products for licensing a user for Windows 10/11 Enterprise:

- Windows 10/11 Enterprise E3
- Windows 10/11 Enterprise E5
- Windows 10/11 Enterprise E3 VDA

IMPORTANT

Make sure you understand the following distinctions between the license types:

- A user assigned a **Windows 10/11 Enterprise E3** or **E5** subscription license can only access a virtual desktop from a device that's running an activated Windows 10 /11 Professional edition OS.
- A user assigned a **Windows 10/11 Enterprise E3 VDA** subscription license can access a virtual desktop from any device (Thin Client, Mac OS, Chromebook, Linux, Windows 10/11 Home, etc.).

The following base plans include Windows 10/11 virtualization rights:

- Microsoft 365 Business Premium (in Azure virtual desktops only)
- Microsoft 365 F3
- Microsoft 365 E3 (includes VDA)
- Microsoft 365 E5 (includes VDA)

NOTE

The **Microsoft 365 Business Premium** base plan must be paired with one of the **Windows 10/11 Enterprise** licenses when a user is accessing a virtual desktop that is not in Azure.

The **Microsoft 365 E3 & E5** base plans include Windows 10/11 Enterprise VDA rights, which means the user can access a virtual desktop from any device (Thin Client, Mac OS, Chromebook, Linux, Windows 10/11 Home, etc.).

The following base plans do not include any Windows 10/11 virtualization rights, and must be paired with one of the **Windows 10/11 Enterprise** licenses:

- Microsoft 365 Business Basic
- Microsoft 365 Business Premium (when not in Azure)
- Microsoft 365 F1
- Office 365 F3
- Office 365 E1
- Office 365 E3
- Office 365 E5

Office Suite of Apps

Microsoft has two subscription products for their Office apps:

- **Microsoft 365 Apps for Business** (formerly Office 365 Business Standard)
- **Microsoft 365 Apps for Enterprise** (formerly Office 365 ProPlus)

Microsoft does not support the **Microsoft 365 Apps for Business** subscription product in a virtual desktop. You must purchase the **Microsoft 365 Apps for Enterprise** subscription product, or a base plan that includes **Microsoft 365 Apps for Enterprise**. Additional details can be found in Microsoft's [Office Applications Service Description](#) article.

The following are the base plans that include **Microsoft 365 Apps for Enterprise**, and support running the Office apps in a virtual desktop:

- Microsoft 365 E3
- Microsoft 365 E5
- Office 365 E3
- Office 365 E5

IMPORTANT

The **Microsoft 365 Business Premium** base plan includes **Microsoft 365 Apps for Business**, but Microsoft has enabled this base plan to support virtual desktops.

The **Microsoft 365 Business Standard** base plan is not supported in a virtual desktop. This base plan also includes **Microsoft 365 Apps for Business**, but Microsoft has not enabled it to support virtual desktops.

See Microsoft's [Office Applications Service Description](#) article for more details.

Which Products Should I Choose?

For organizations that require 300 or fewer seats, the best base plan is **Microsoft 365 Business Premium**. This gives you virtualization rights for Windows 10/11 (in Azure) and the Office Apps. It also gets you additional security features for email, data, identity, and mobile device management.

For larger organizations, the **Microsoft 365 E3** base plan is a good fit, especially if security is a priority. **Microsoft 365 E3** includes **Windows 10/11 Enterprise E3 VDA** and **Microsoft 365 Apps for Enterprise**. Optionally, you can pair the **Office 365 E3** base plan with the **Windows 10/11 Enterprise E3** subscription.

Product Support Matrix

The below table lists each Microsoft base plan and whether it's supported in a virtual desktop. Most of the base plans will need to be paired with the **Windows 10/11 Enterprise E3** add-on subscription to be supported in a virtual desktop.

Product	Virtual Desktop Support	Notes

Microsoft 365 Business Basic	Yes	<ul style="list-style-type: none"> No Office apps Must pair with one of the Windows 10/11 Enterprise subscriptions
Microsoft 365 Business Standard	No	<ul style="list-style-type: none"> Microsoft does not support this base plan in a virtual desktop See Microsoft's Office Applications Service Description article for more details
Microsoft 365 Business Premium	In Azure Only	<ul style="list-style-type: none"> Includes virtualization rights for Windows 10/11 in Azure only Must pair with one of the Windows 10/11 Enterprise subscriptions when not in Azure Includes virtualization rights for Microsoft 365 Apps for Business
Microsoft 365 E3	Yes	<ul style="list-style-type: none"> Includes Microsoft 365 Apps for Enterprise Includes Windows 10/11 Enterprise E3 VDA
Microsoft 365 E5	Yes	<ul style="list-style-type: none"> Includes Microsoft 365 Apps for Enterprise Includes Windows 10/11 Enterprise E3 VDA
Office 365 E1	Yes	<ul style="list-style-type: none"> No Office apps Must pair with one of the Windows 10/11 Enterprise subscriptions
Office 365 E3	Yes	<ul style="list-style-type: none"> Includes Microsoft 365 Apps for Enterprise Must pair with one of the Windows 10/11 Enterprise subscriptions
Office 365 E5	Yes	<ul style="list-style-type: none"> Includes Microsoft 365 Apps for Enterprise Must pair with one of the Windows 10/11 Enterprise subscriptions
Microsoft 365 F1	Yes	<ul style="list-style-type: none"> No Office apps Must pair with one of the Windows 10/11 Enterprise subscriptions
Microsoft 365 F3	Yes	<ul style="list-style-type: none"> No Office apps Includes the Windows 10/11 Enterprise E3 subscription
Office 365 F3	Yes	<ul style="list-style-type: none"> No Office apps Must pair with one of the Windows 10/11 Enterprise subscriptions
Microsoft 365 Apps for Business	No	<ul style="list-style-type: none"> Microsoft does not support this product in a virtual desktop See Microsoft's Office Applications Service Description article for more details
Microsoft 365 Apps for Enterprise	Yes	<ul style="list-style-type: none"> Must pair with one of the Windows 10/11 Enterprise subscriptions
