Overview

Microsoft Intune is Microsoft's endpoint management solution used to ensure devices, operating systems, and apps are up-to-date, protected, and performant. This article covers the changes Microsoft made on March 1, 2023.

NOTE

To learn more about Microsoft Intune's features, take a look at Microsoft's [Intune Overview](#) article.

Intune Product Changes

Microsoft has made the following changes to their Intune product lineup:

- Renamed **Microsoft Intune** to **Microsoft Intune Plan 1**
- Added a new product: **Microsoft Intune Plan 2**
- Added a new product: **Microsoft Intune Suite**

Feature Comparison

Feature	Intune Plan 1	Intune Plan 2	Intune Suite
Cross-platform endpoint management	✓		
Built-in endpoint security	✓		
Mobile application management	✓		
Endpoint analytics	✓		
Microsoft Configuration Manager *	✓	✓	✓
Tunnel for Mobile Application Management		✓	✓
Management of specialty devices			✓
Remote Help	add-on		✓
Endpoint Privilege Management	add-on		✓
Advanced endpoint analytics	add-on		✓
Advanced app management (mid 2023)	add-on		✓
Cloud certification management capabilities (late 2023)	add-on		✓

* Microsoft Configuration Manager is included in all Plan 1 licenses except Business Premium.

Licensing Rules

Both of the new Intune products are add-ons to **Microsoft Intune Plan 1**. In other words, you cannot assign **Microsoft Intune Plan 2** licenses or **Microsoft Intune Suite** licenses to a user account without also assigning **Microsoft Intune Plan 1**.

Keep in mind that **Microsoft Intune Plan 1** is already included in the following subscriptions bundles:

- Microsoft 365 Business Premium
- Microsoft 365 E3/E5/F1/F3
- Enterprise Mobility + Security E3/E5

Therefore, you can add **Microsoft Intune Plan 2** or **Microsoft Intune Suite** to the above subscription bundles.
