Mimecast

MIMECAST

Mimecast is a Software-as-a-Service-based enterprise email management solution for archiving, e-discovery, continuity, security and policy enforcement. It is a single modular service that integrates with your existing IT to take care of all of your email requirements online, with no hardware, software, or capital expense and it takes just a few days to set-up. By connecting your current email systems to Mimecast, you instantly deliver unified email security, continuity and archiving.
