## **Delete a Catalog**

You can delete a catalog from your organization.

## Prerequisites

This operation requires the rights included in the predefined Catalog Author or an equivalent set of rights.

Note: The catalog must not contain any vApp templates or media files. You need to delete the items from the catalog before you can remove it.

## Procedure

- 1. On the Virtual Datacenters dashboard screen, click the card of the virtual data center you want to explore.
- 2. From the main menu select Libraries and select Catalogs from the left panel.
  - a. Verify that there are no vApp Templates or Media in the Catalog, if there are you will be unable to delete the Catalog.

- 3. Click next to the catalog you want to remove and click Delete.
- 4. Confirm the deletion.
