

Handset Management

This article is intended for O365 Administrators with access to Microsoft Teams Admin Center

Overview: As an admin, you manage all devices used with Teams in your organization from the Microsoft Teams admin center. You can view and manage the device inventory for your organization and do tasks such as update, restart, and monitor diagnostics for devices. You can also create and assign configuration profiles to a device or groups of devices.

Start by going to the **Microsoft Teams Admin Center** and login with your Office 365 credentials

https://docs.microsoft.com/en-US/microsoftteams/device-management?WT.mc_id=TeamsAdminCenterCSH

Phones
Control and manage IP phones that have been certified for use with Teams. You can create and upload configuration profiles for each type of phone you have, make changes to their settings, and apply software updates. [Learn more](#)
