Overview

The Microsoft Teams application is designed to be a very consistent, structured experience on all devices: Windows desktops, Mac, Web-browsers, iOS mobile devices, Android mobile devices, AND desktop phones and video conferencing units (VCU). This is extremely important for businesses that are preparing for installation and training because it should minimize apprehension around call handling. A user will perform the following functions with all the same clicks on any of those devices:

- Answer calls, Hold, Unhold, Mute, Unmute, End Calls
- Blind transfer, Consult (warm) Transfer, **Remember Microsoft does not support Ad Hoc 3-way conferencing**
- Accessing call history, voicemail, searching contacts, and dialing

Evolve IP is responsible for consolidating and enabling businesses with the Microsoft content for How-To Videos and Guides for performing route functions. That content is organized below and often links to Microsoft content so that it's always the MOST-CURRENT documentation with ongoing application releases.

Collaboration versus Calling: Business Transformation is underway. When moving toward a Microsoft Teams solution, your business values communications in the following order:

1) Collaboration 2) Meetings and conferencing- online and in-person 3) Traditional Calling

MICROSOFT TEAMS QUICK START GUIDE

Microsoft Teams

Quick Start Guide

New to Microsoft Teams? Use this guide to learn the basics.

Move around Teams
Use these buttons to switch between Activity Feed, Chat, your Teams, Calendar & Files.

View and organize teams
Click to see your teams. In the teams list, drag a team name to reorder it.

Find personal apps
Click to find and manage your personal apps.

Add apps
Launch Apps to browse or search apps you can add to Teams.

Every team has channels
Click one to see the files and conversations about that topic, department, or project.

Start a new chat
Launch a one-on-one or small group conversation.

Add tabs
Highlight apps, services, and files at the top of a channel.

Use the command box
Search for specific items or people, take quick actions, and launch apps.

Manage profile settings
Change app settings, change your pic, or download the mobile app.

Manage your team
Add or remove members, create a new channel, or get a link to the team.

Join or create a team
Find the team you're looking for, join with a code, or make one of your own.

Add files
Let people view a file or work on it together.

Reply
Your message is attached to a specific conversation.

Compose a message
Type and format it here. Add a file, emoji, GIF, or sticker to liven it up!
