SMS - Evolve Messaging Application

Evolve Messaging (SMS)

The **Evolve Messaging SMS Application** is for Evolve IP unified communications clients to send and receive text messages (SMS/MMS) from your business phone number. This helps organizations better manage corporate communications and reduce liability for employees sending text messages from their personal or company cell phone to which they have no management.

The application is available from web browsers and available within Microsoft Teams for ease of access and high availability, which leads to greater use and productivity.

This is a top-level page for general information. Please click the links below or use the left-hand navigation menu to access key information about the **Evolve Messaging SMS Application.**
