## **DaaS Implementation and Training**

applications, or even the ability to customize desktop usage to meet their own preferences.

DaaS is unique in its ability to give users what they want, when and where they want it. As user expectations become more specific and pronounced, IT organizations are scrambling to come up with new ways to meet those expectations, whether they concern device usage, location independence, access to all available corporate data and

Evolve IP has created resources to help manage your DaaS environment and get the most out of DaaS.
